

QUALITY COMPONENTS INTERNATIONAL

YOUR HEAVY
EQUIPMENT PARTNER

QCI QUALITY
COMPONENTS
INTERNATIONAL

More Than a Supplier...Your Partner in the Heavy Equipment Industries

We are more than a supplier, we partner with you to efficiently produce your components. Our team works with representatives from your organization to streamline the manufacturing process for your components in our plants and yours.

We use many tools to achieve Continuous Improvement objectives, including Enterprise Value Stream Mapping, through which a team of employees is empowered to make meaningful changes as they examine the complete value stream from order entry to shipping. After creating a visual representation of the value stream, revealing current areas of waste, and brainstorming about a more efficient future, the team develops and implements action plans.

From large boom assemblies
for excavators ...

...precision parts cut on a
CNC Laser Cutting Table,
we can produce the
quality components you
need for your heavy
equipment industry.

Quality Components

Quality Components International (QCI) can now produce operator cabs and sheet metal products, which complements our capacity to manufacture welded and machined frames and critical components for the heavy equipment industry. In addition to a comprehensive array of components, we provide design engineering, manufacturing and quality assurance services.

We have extensive experience working with companies in the mining, rapid transit/rail, forestry, agriculture, defense, construction, off-highway, utility, and pulp and paper industries.

Engineering and Design

In addition to a wide range of standard equipment, we can fabricate custom solutions to suit your unique application. Our expert sales and engineering staff will help you select the materials, features and accessories suited to your needs.

Our qualified engineers can work with your plans or design a component from scratch.

“QCI has a history of producing quality components on time with competitive pricing.”

Dennis Butcher, Contract Negotiator, Link-Belt Construction Equipment

Service and Delivery

Our committed team of professionals provides “no surprises” project management and ensures project costs are kept to a minimum through accurate quotations, realistic scheduling, diligent internal coordination, ongoing communication, on-time or just-in-time delivery, and courteous follow-up.

We can assemble components into finished units or ship them to you for assembly at your location.

Our commitment to Continuous Improvement ensures that we are always striving to produce innovative, quality products in the most cost-effective and efficient manner possible.

BUILDING ON TRADITIONS OF EXCELLENCE

Since 1923, Clemmer has built its reputation on the strength of its products, superior engineering, and service delivery that goes above and beyond expectations.

Through the addition of Steelcraft Industries, including its Quality Components International division, Clemmer Steelcraft Technologies Inc. (CSTI) expanded its capacity to provide state-of-the-art manufacturing equipment.

With the recent purchase of the assets of Brute Manufacturing CSTI has further expanded the line of quality components it can produce for the heavy equipment industries.
